Notes	
	NB May see Venn diagram for A and B only used for (a) and (b) but M marks are awarded for <u>correct expressions only</u> . No ft from an incorrect diagram for M marks.
(a)	M1 for attempt to use the addition rule. Correct substitution i.e. correct expression seen A1 for 0.67 only. Correct answer only scores 2/2
(b)	M1 for a correct ratio of probabilities or a correct formula and at least one correct prob For a correct formula allow “1 – their (a)” instead of 0.33 but not for correct ratio case. Do not award for assuming independence i.e. $\frac{P(A \cap B')}{P(B')} = \frac{0.65 \times 0.55}{0.55}$ is M0. M0 if num>denom A1 for 3/5 or any exact equivalent.
(c)	M1 for correct expression. Need correct values for $P(B)$ and $P(C)$ seen. A1 for 0.09 or any exact equivalent. Correct answer only is 2/2
(d)	No labels A, B, C in (d) loses 1st B1 but can score the other 3 by implication B1 for box with B intersecting A and C but C not intersecting A . No box is B0 B1ft for 0.13 and their 0.09 in correct places. [ft $P(B \cap C)$ from (c)] B1 for any 2 of 0.22, <u>0.22</u> , 0.11 and 0.23 correct B1 for all 4 values correct
(e)	M1 for a correct expression or follow through from their Venn diagram NB $P(B') \times P(C') = 0.55 \times 0.8$ is OK. Do not ft “blank” for zero and M0 for negative probs. A1 for 0.44 only. Correct answer only is 2/2
